

Instruction book-Led Bulkhead

We appreciate that you use our product.

General safety manual:

Before you start using the product make sure that it is safe and undamaged.

DO NOT USE broken or damaged product.

Do NOT USE unopened product.

The product can only be connected to the mains circuit by a professional!

If your faulty product has warranty, please return it to the seller. In case of expired warranty you can ask for technical repair or take it back to one of the collection points.

Attention!

DO NOT TRY to repair or modify the product on your own in order to avoid an electrical accident. Unusable products are electrical wastes so please take it to a waste collection point.

Application:

The ufo lights are using screws to capture and adjust. Because of the minimal nature of heat production in any material surface can be installed.

The product can be connected by terminal to mains voltage.

Attention!

The ufo light's fixed connection can only be installed by a professional!

The product's socket can only be repaired/changed by a professional.

The product's light part, the performance LED can not be replaced.

If the product shows failure or unsteadiness while functioning please de-energize the product immediately and replace it if possible!

Do not use it with a central movement sensor because the product may spoil. In this case the warranty is invalid.

The product works well only with full power, with night power switching destroyed. If you used light with night power, we can evince it and in this case the guarantee is not valid! Anyway theft counts if you use the night power for lighting!

The product's enclosure rating IP54 is made by the manufacturer. The product is completely protected against dust and splash water from every angle.

Technical data:

Operation voltage:85-265VAC

Power consumption: 15-20W

Connection type: terminal

Operation temperature: -20...+40 C°

Enclosure rating: IP54

Fixing: Screw

Size: Shown on cover.

Importer/Dealer:

Made in China.

Warranty: 24 month.
